

# ALTTIC CONFERENCE CHEMISTRY

05-06.NOV.2022

ONLINE

## Invitation

[www.bcc.ug.edu.pl](http://www.bcc.ug.edu.pl)

# The Baltic Chemistry Conference

is an international student-doctoral conference that aims to increase the scientific potential of young scientists. The conference is completely free for speakers and passive participants. At BCC, young speakers from different countries (students, doctoral and young scientists) can present their research results or a problem on popular science topics.

A form of speech in which the speaker gives a short presentation on a chosen topic. The presentation is presented as a video (15 min). Afterwards, all participants of the Baltic Chemistry Conference will be able to ask questions to the presentation online (online participation of the speaker required).

A speaking format in which the speaker submits a pdf poster and a 5-minute video of the poster where they discuss the issue being presented. The posters will be made available on the website under Posters, and speakers are required to respond to comments during the poster session and during the conference via text chat (comments).

## Important dates

01.08.2022-30.09.2022

registration and abstract submission

30.09.2022

deadline video submission (presentation & poster)

16.10.2022

Confirmation of participation

05-06.11.2022

Baltic Chemistry Conference
